

Sprint2 Report

- Product name: Foodie More
- Team name: Four-gangs
- Sprint 2 due: May.17 2017
- Revision number: 1
- Revision date: May.17 2017

Action to stop doing:

- Meeting at random location
- Add too much features

Action to start doing:

- Simplify the work

Action to keep doing:

- Daily Scrum meetings and more communication in coding about data structure for the project
- Keep using trello board and slack for communication
- Do a unit test for each feature that have achieved
- Clean the code

Work Completed:

1. As a front-end developer, I need to use APIs provided by the server to send requests and receive responds. Then I make the front-end app update UI and internal data structures according to the returned data from the server.

- Communicate with team members to make an agreements
- Proper establish connection to the database
- Define the layout to well present the view

2. As a back-end developer, I need develop the searching algorithm and searching option.

- Design a searching layout
- Implement the searching algorithm based on the rating

3. As a user, I am able to add the dishes into my shopping cart.

- Design two objects, one to store one dish chosen, another to store all the dishes chosen
- Make a page two show all the dishes added

Work Not Completed

As a back-end developer, I need develop the searching algorithm and searching option.

- Not be able to implement the searching algorithm based on the variables of restaurants
